

Introducing the EVGA GeForce GTX 1660 - Zero Compromise Gaming

- **Thursday, March 14, 2019** – Introducing the EVGA GeForce GTX 1660 - Zero Compromise Gaming

March 14th, 2019 - The EVGA GeForce GTX 1660 Graphics Cards are powered by the all-new NVIDIA Turing architecture to give you incredible new levels of gaming realism, speed, power efficiency, and immersion.

With the EVGA GeForce GTX 1660 Graphics Cards you get the best gaming experience with next generation graphics performance, ice cold cooling and advanced overclocking features with the all new EVGA Precision X1 software.

Hydro Dynamic Bearing Fans

First HDB fan on an NVIDIA graphics card optimizes airflow, increases cooling performance, and reduces fan noise by 15%, compared to more commonly-used sleeve-bearing fans on graphics cards. The special upraised 'E' pattern on the enlarged fan allows a further reduction in noise level by 4%.

Next-Gen Overclocking

With a brand new layout, completely new codebase, new features and more, the new EVGA Precision X1 software is faster, easier and better than ever. <https://www.evga.com/precisionx1/>

Your Choice

EVGA GeForce GTX 1660 graphics cards offer you more ways to keep your system cool than ever before. Offering a variety of fan choices, heatsink sizes, and cooling technologies, you can select the card that fits your system perfectly.

EVGA GeForce GTX 1660 2 Slot Cards are longer, but allow for more airflow at slower speeds with two fans. Utilizing a smaller fan hub, these fans feature a longer blade to increase airflow while remaining quiet.

Includes FREE GRIP: Combat Racing Game and a GRIP Exclusive EVGA Vehicle Skin

GRIP is a high octane, hardcore combat racer, packing ferocious speed and armed to the teeth with heavy weapons. A futuristic combat racer inspired by Rollcage! Learn more at <https://www.evga.com/articles/01293/evga-grip-promotion/>
