

EVGA 700B Power Supply – Performance Meets Value

- Thursday, December 10, 2015 – The EVGA 700B Power Supply is the best value for your next build. With 80 Plus Bronze standard, over 85% efficiency under typical loads, the EVGA 700B is a great choice. Combining 700W of continuous power make and a single +12V supporting 56A, make this the perfect power supply for a high performance system. Stay protected with a series of multiple safety protections all bundled into one!

Key Features:

- High amperage single-rail design for maximum power and efficiency.
- 80 PLUS Bronze certified, with 85% efficiency or higher under typical loads.
- Heavy-duty protections, including OVP (Over Voltage Protection), UVP (Under Voltage Protection), OCP (Over Current Protection), OPP (Over Power Protection), and SCP (Short Circuit Protection).
- Continuous power ensures the longevity and stability at the officially rated wattage, rather than rating off an unsustainable peak wattage.
