

EVGA launches the EVGA Tegra NOTE™ 7 into Europe with immediate availability in Germany, Austria, and Switzerland

- Thursday, March 27, 2014 – The EVGA Tegra NOTE™ 7 tablet is the perfect travelling companion – combining a lightning-fast mobile processor with a brilliant 7-inch (17.8 cm) HD display in a sleek, comfortable design. Play the latest games at full speed. Capture stunning photos. Watch HD video for up to ten hours. And listen to your favourite music with booming, room-filling NVIDIA PureAudio™. It's mobile freedom at the speed of life.

Exceptional technology:

First 7-inch (17.8 cm) tablet to feature the blazing fast NVIDIA Tegra® 4 mobile processor

- World's fastest 7-inch Android tablet
- Quad-core, plus a 5th battery-saver core
- Features a 72-core NVIDIA GeForce® GPU

NVIDIA DirectStylus™ for an incredibly responsive and natural writing experience

- Patented stylus system allows for highly sensitive variable stroke width
- 3x more responsive than other available stylus solutions
- Only Chisel-tip stylus on the market
- Intuitive note taking, annotation, capturing, and sharing
- Edit PDFs: write, save, share
- Full lasso selection for easy editing
- Grab images in any app, and easily share
- Stylus support, plus finger and palm recognition

NVIDIA Chimera™ computational photography for Always-On HDR

- World's first HDR camera in a tablet: Capture exactly what your eye sees
- Tap-to-Track: Choose any object to track so it's in focus when you're ready to take the shot
- Slow-motion: Gear down the action for drama and effect

NVIDIA PureAudio™ for the deepest, richest tablet audio

- Front facing stereo speakers with a bass reflex port for true stereo sound
- Extended frequency response 380-12 kHz – compared to typical 800-5 kHz range

Premium Tegra 4 audio processing for louder, cleaner, richer sound

NVIDIA PRISM 2 display processing, which modulates the display backlight and per-pixel colour values to extend battery life up to 40%

NVIDIA TegraZone for the best gaming experience on Android

- The one-stop shop for all your enhanced Tegra HD games
- Enjoy HD Tegra gaming on your big-screen TV via HDMI

100% Android:

- Uncluttered, up-to-date, synchronised app and profile support across Android devices
- Full Google Mobile Services (GMS) and over-the-air (OTA) updates
- Full Google Play certification

Incredible Value:

- The fastest, loudest, most fun tablet you can find – at an affordable price
- Compose and create on the fly using the incredibly intuitive NVIDIA DirectStylus™ and bundled apps
- Astounding front-facing NVIDIA PureAudio™ stereo sound with unique bass reflex port
- 5 MegaPixel Always-On HDR camera
- World's first Always-On HDR tablet, capturing scenes exactly as your eye sees them
- World's first Tap-to-Track tablet, allowing automatic tracking, focus, and exposure of the object
- VGA front camera for video chat
- World-class NVIDIA engineering (mechanical design, software, electrical, quality, over-the-air updates)
- 7-inch (17.8 cm) 1280x800 IPS display
- Compatibility with Built for NVIDIA Tegra wireless game controllers means console-quality gaming is available through the tablet
- Over-the-air (OTA) update support to keep your Tegra NOTE 7 up to date

Additional Specs:

- 16GB storage + MicroSD card slot
- Wi-Fi 802.11n
- 4100 mAh battery for up to 10 hours HD video playback
- Bluetooth 4.0 LE
- GPS, 9-axis motion with gyro, accelerometer, compass
- Micro HDMI to connect to HDTV
- Ambient light sensor for backlight control
