Power Matters with EVGA PowerLink

Clean up your Power and System!

Everyone knows that the EVGA PowerLink does wonders to improve your cable management for your graphics card. But did you know that the EVGA PowerLink also stabilizes the power going into your graphics card?

Power Matters

The EVGA PowerLink is designed to provide both a more stable power source and reduce ripple and noise, compared to connecting your power supply directly to the graphics card. The EVGA PowerLink features two solid state capacitors that help to filter/suppress ripple and noise from the power supply.

The practical impact can be seen in power graphs. The 12V line going into graphics card without a PowerLink under load rates a Peak-to-Peak voltage of 1,008mV, while the 12V line going into the graphics card with a PowerLink is only 728mV. That's nearly a 28% reduction in voltage variation from the external power source!

Revolutionized Cable Management

The EVGA PowerLink has another function: to make your PC look even more awesome. This adapter allows you to reroute the power inputs for your graphics card, giving you improved case airflow, a lower profile height, and best of all, cleaner wiring setup. It even supports a unique configuration system allowing you to mix and match power input types to match your graphics card.

Available Now

The EVGA PowerLink is a great investment to not only improve the way your PC looks, but also protect your graphics card. Learn more at <https://www.evga.com/powerlink>.

About EVGA

EVGA is the #1 NVIDIA authorised partner in channel sales throughout North America and UK. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, a 90 day Step-Up programme, and other customer focused programmes, EVGA is a clear leader in all categories: etail, retail, distribution, and system integration. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit: <http://eu.evga.com>.
