

Introducing the New EVGA GeForce GTX 970 SSC – 140MHz Faster, 6% Cooler GPU, 33% More GPU Power!

- **Wednesday, January 7, 2015** – The new generation of EVGA GeForce GTX 970 has arrived with the SSC. This enhanced model offers improved cooling, double BIOS support, new display output configuration, and 6 power phases for robust overclocking support.

These new cards also feature EVGA ACX 2.0 cooling that features optimised swept fan blades, double ball bearings, and an extreme low power motor. The EVGA ACX 2.0 cooler offers more air flow, with less power, unlocking additional power for the GPU.

New Features:

- dBi – dB Noise Inverter turns fans off below 60C, generating 0dB of noise during idle!
- QSD BIOS – Quick Switch Dual BIOS allows you to switch to a secondary BIOS with the flick of a switch.
- MMCP – Memory MOSFET Cooling Plate reduces MOSFET temps by 47% and Memory by 14%
- OPT – Optimised Power Target offers 33% more power over reference
- SHP – Straight Heat Pipes reduce GPU temperature by almost 5C!
