

## EVGA Z170 Classified K – Killer Performance

- **Thursday, January 14, 2016** – The EVGA Z170 Classified K is engineered from the ground up for the hardcore gamer. Featuring a next generation Intel Z170 Express Chipset with DDR4 3600MHz+ memory support, this motherboard is built to dominate. Built in Killer Ethernet helps to prioritize and reduce network latency to keep you at the top of your game. Of course, with EVGA overclocking DNA, this board is built for overclocking with a robust VRM and hardware design that is built for speed.

New and Key Features:

- Intel Z170 Platform – The latest chipset from Intel giving excellent performance and efficiency.
- Killer E2400 NIC – Helps to prioritize and reduce network latency to keep you at the top of your game.
- USB 3.1 Support – The latest USB standard gives you the ultimate transfer performance.
- Built for Overclocking – Robust GUI BIOS focuses on functionality and gives you incredible overclocking performance.
