

EVGA DG-7 Series Gaming Case - Now Available for Preorder!

- **Wednesday, November 15, 2017** – The mid-tower is the ideal form factor that is well balanced between usable space and overall footprint. DG-7 is a case designed with aesthetics and function in mind, and is the perfect mid-tower solution. DG-7 features convenient and easy cable management, wide range of radiator support, and a durable steel frame. The tempered glass side panel is perfect to show off your system, no matter if you go with traditional GPU mount or vertical GPU mount.

Key Features:

- Up to 3 Sided Tempered Glass – Immaculate tempered glass side and front panels make the DG-7 series the perfect case to show off your components.
- Vertical GPU Mounting (Optional) – Make your GPU the center of attention with vertical GPU mount.
- Full RGB Control – RGB lighting and control board give you the control to sync up all RGB lighting in your system.
- K-Boost for Optimum Performance – Get the most out of your system at the touch of a button. K-Boost features one button overclocking for the CPU and GPU
- Convenient and versatile to build – Built in cable management, covered PSU shroud, and hidden hard drive trays for a clean and easy build. Supports up to 7 case fans, fully compatible with 360mm, 280mm and 120mm radiators.
- DG Tuner Software Support – Allows you to fully control the RGB lighting in your case.
- 3 Year Warranty
