

**EVGA G1+ Power Supplies - Now Available!**

**- Friday, February 9, 2018** – The New Gold Standard for Performance and Value

February 9th, 2018 – The EVGA SuperNOVA G1 power supplies have been among the longest-lasting and best-performing power supplies on the market. Despite only a few changes over the years, it's only fitting that it's time for an upgrade. Enter the G1+, the new and improved fully-modular power supply line-up from EVGA with an 80+ Gold Efficiency rating.

Additionally, the G1+ power supplies feature a cleaner internal layout to increase airflow, a Variable Resistor module (to increase voltage stability), two DC to DC modules for more efficient power switching on all models, a full suite of power supply protections, and EVGA's World-Leading Global 10-Year Warranty on all G1+ power supplies.

When it comes to building a system, even the smallest differences can make or break your build. Each G1+ power supply is between 10mm to 20mm shorter than its G1 counterpart, giving you more space without sacrificing quality.

**Key Features**

- Shorter Length – Up to 20mm shorter than G1.
- Quieter and Longer Lasting Fan – Fluid Dynamic Bearing for the ultimate in quiet operation and long life operation.
- Tighter 12V Load Regulation for clean and stable power.
- Up to 22% Quieter Under Load
- 10 Year EVGA Warranty
