

EVGA GeForce GTX 950 Low Power

- Tuesday, April 5, 2016 – The Performance Without The Power Requirements

April 5th , 2016 - The EVGA GeForce GTX 950 features a true gaming GPU designed for every PC gamer. It's built to the exact specifications of the GeForce GTX family and powered by NVIDIA Maxwell – the most advanced GPU architecture ever created – to deliver 3x the performance of previous-generation cards.* More powerful than any console, this card delivers a truly interactive, cinematic experience in the latest games with advanced effects driven by NVIDIA GameWorks and DirectX 12.

The EVGA GeForce GTX 950 is now available in special low power models, but still retains all the performance intact. In fact, several of these models do not even have a 6-Pin power connector!
