- Thursday, May 10, 2012 –

Get to the next level with the EVGA GeForce GTX 670. This card delivers truly game-changing performance that taps into the powerful new GeForce architecture to redefine smooth, seamless, lifelike gaming. It offers brand new, never before seen features that will redefine the way you think about performance graphics cards. Expect more from your graphics card than just state-of-the-art features and technology; get a faster, smoother and richer gaming experience with the EVGA GeForce GTX 670.

The EVGA GeForce GTX 670 graphics card features many new and key features: NVIDIA SMX Engine - Brand new processing engine which delivers twice the performance/watt compared to previous generations NVIDIA GPU Boost Technology - Dynamically maximizes clockspeeds to push performance to new levels and bring out the best in every game. NVIDIA FXAA - Lightning fast anti-aliasing in a huge variety of games with the simple click of a mouse. NVIDIA TXAA - Next generation anti-aliasing algorithm that delivers the image quality of 8X MSAA, with the performance hit of only 2xMSAA. Adaptive Vertical Sync - Dynamically adjusts VSync to your monitors native refresh rate for the smoothest gameplay possible. Frame Rate Target - Set a target Frame Rate with EVGA Precision X and your card will automatically adjust the power/performance to meet that target NVIDIA 3D Vision Surround - Support up to three gaming monitors plus one accessory display! PCI Express 3.0 - Offers double the bandwidth of PCI Express 2.0, for highest data transfer speeds. Also backwards compatible with all existing PCI Express motherboards.
